# IMPORTANT SHIPPING NOTE!

## Lithium Battery Shipping Information

The *SatAlarm-Sentry CID2* unit contains lithium batteries. Different regulatory bodies regulate shipment of lithium batteries and of devices containing lithium batteries, both domestically and internationally. **Each of the battery packs used in the Sentry contains less than 11 grams of lithium in each pack and not more than 5 grams of lithium in any individual cell.**

For **DOMESTIC** shipments within the United States, the batteries and equipment containing these batteries are regulated under 49 CFR. The 49 CFR regulations in effect today **allow** the battery packs themselves and the *SatAlarm-Sentry CID2* with the batteries in it to be **excepted** from the requirement to be shipped as CLASS 9 hazardous material. Refer to 49 CFR Part 173 for instructions on shipping and labeling.

For **INTERNATIONAL** shipments, these batteries are regulated under UN 3090, and for equipment containing these batteries under UN 3091. Under these regulations, the batteries and the *SatAlarm-Sentry CID2* with the batteries in it **are** considered, under all circumstances, to be:

**CLASS 9 Hazardous Material** .

Shipping *SatAlarm-Sentry CID2* units or the battery packs across international borders requires that the shipments conform to the rules set forth by the IATA, ICAO, or ARD as they pertain to the shipment of CLASS 9 lithium batteries and equipment containing same. This includes shipments from the USA to Canada and Mexico.

If you have any questions on these issues, please contact AMCI's Customer Service Department at +1.303.279.2002 ext. 700.
